Grading Policy

Operating Systems

Grade Categories

- Class Exercises [5] – 20%
  - Due by the end of a class period
- Class Presentation[2] – 20%
  - Presentations of topics – 2 in the 2nd Weekend
- Written Assignments[4] – 30%
  - On papers on current and research topics
- Programming Assignments[3] – 30%
  - Due dates are provided

Grades:
A : =>90 – 4.0
B : =>80 – 3.0
C : => 70 – 2.0
D : => 60 – 1.0

Written Assignments

- Written Assignment is usually a one or two page explanation with diagrams.
  - Example:
    - When you turn on your laptop, what happens?
    - Be technical in detail and explain all terms used, like BIOS.

Programming Assignments

- Please include instructions on how to run it

- Include instructions on how to look for

- Include debugging print to show that it produces the correct results

- Syntax errors are usually not good and points are deducted

- Stack dumps are not good. If you know the program is going to die at certain way, include instructions on how to avoid it.

- Most assignments must be in Python 3.5 or higher

Submission due date

- Each assignment has different due dates
- Presentation assignments are due the very day of presentation
- All assignments must be submitted to Moodle OR it does not count.
- Check with late policy on late submission

Late Policy

- Moodle determines whether you are late or not
- In order to help you cope with unexpected emergencies, you can hand in your assignments late, but the total amount of lateness summed over all the deadlines must not exceed 72 hours.
- If you don't hand in an assignment by the last day of classes, we'll give the assignment an F.
- If you hand an assignment in late, and your total late time (including the late time for that assignment) exceeds 72 hours, and you hand it in by the last day of classes, then we'll give it a D or an F depending on whether it seems to basically work.
- You can divide up your 72 hours among the assignments however you like; you don't have to ask or tell us.
- If you want an exception to these rules, please contact me and come with a really good and genuine excuse note.

Moodle tracking

- You should see these categories with their weights
- When all the created assignments are in their right categories, the final score is correct
- When you see some of the assignments are not assigned, or in the unassigned category, the final score is INCORRECT or FALSE.
- IT is YOUR responsibility to check your current grade in Moodle, and report any errors.
